PROPOSAL #CS-2026-0155

Date: March 27, 2026
Valid for: 7 days

Prepared for: CreateStage Fabrication

SCOPE OF WORK

Cantilever Sliding Gate

This project includes the design, fabrication, and installation of a cantilever sliding gate spanning a 12-foot clear opening at the rear alley, connecting the two existing fence sections on either side of the property. The gate will feature a clean, squared frame with evenly spaced vertical picket infill, providing a uniform and attractive appearance that complements the surrounding fencing. Because the gate operates on a top-mounted cantilever roller system, there are no ground tracks or bottom obstructions - keeping the threshold completely clear for smooth, unimpeded passage across the opening.

The finished gate will arrive fully primed and painted, delivering a durable, weather-resistant finish that is ready for everyday exposure from the start. This protective coating helps guard against rust and the elements, reducing the need for near-term maintenance and keeping the gate looking sharp for years to come.

In addition to the gate itself, the scope covers the supporting post assemblies on each side of the opening, engineered to carry the weight and movement of the cantilever system reliably over time. The end result is a secure, smoothly operating entry point that ties both sides of the property's fencing together into one cohesive perimeter - combining practical security with a polished, professional look.

Project Specifications:

Opening Width:	12 ft ft
Finish:	Primer and paint

PRICE SUMMARY

Materials & Hardware	$5,350.00
Labor	$8,196.62
Finishing	$309.29

PROJECT TOTAL $13,855.91

WHAT'S INCLUDED

- All structural steel and materials
- All required hardware and mounting components
- Welding and fabrication consumables
- Complete shop fabrication and assembly
- Paint finish applied

NOT INCLUDED

- Permit fees and engineering review
- Demolition or removal of existing work (unless explicitly included)
- Concrete work beyond post holes
- Permit acquisition - Chicago may require building/fence permits. Not included.
- Engineering stamp or structural calculations - not included. Recommend PE review for 10 ft cantilever gate.
- Utility locates (JULIE/811 call) - customer responsibility before core drilling.
- Gate operator/motor - customer specified manual slide. Add motorization separately if needed later.
- Decorative elements (scrollwork, finials, etc.) - not described, not included.
- Removal or modification of existing property fences at connection points.
- Concrete repair/patching around core-drilled post holes.
- Drainage or grading work.
- Any work above 10 ft height (no overhead structure or canopy).
- Galvanizing - finish is primer and paint per customer request.
- Spare parts or maintenance kit for roller hardware.

TERMS & CONDITIONS

This proposal is valid for 7 days from the date above.

Deposit due at signing: $5,350.00 (100% of materials) + $4,098.31 (50% of labor) = $9,448.31 total deposit. Remaining balance of $4,407.60 due upon completion.

Timeline will be confirmed upon acceptance of this proposal.

Any changes to the scope of work may result in additional charges.

All work performed to industry standard practices.
